Endermologie

Endermologie is the technology of healthy beauty.

When fat becomes trapped underneath the skin it can cause a dimpling effect that is known as cellulite. While diet and exercise are keys to a healthy lifestyle, these alone cannot fight cellulite. Endermologie is a patented FDA cleared and proven process known to fight cellulite and improve body contouring while providing a greater sense of wellbeing.

The difference is in the mirror, not on the scale.

Endermologie revolutionizes the fight against Cellulite. Our philosophy encompasses a holistic view toward health and beauty.

The main goal is finding a balance between the stress of our daily lives and our wellbeing. With Endermologie, the benefits are profoundly evident. Relax as you experience the smoothing sensation of our unique and beneficial technique.

Microcurrent Facial Toning

Microcurrents aid in diminishing the signs of aging by reducing the appearance of fine lines and wrinkles. This system uses muscle re-education to stimulate and tone as well as to increase the body's natural production of collagen and elastin resulting in a more youthful, beautiful you.

The benefits are cumulative and typically are performed in a series to gain maximum results. The average series consists of 6 to 12 sessions administered two times weekly.

The Microcurrent facial includes cleansing, exfoliation, and a customized, hydrating mask.

The results of lomilomi are deep and lasting bringing restorative balance and relaxation.
